- B:** minute hand
- C:** hour hand

- New with scratch-resistant ceramic diving bezel and clearly readable numbers
- Pressure resistant to 20 ATM and screw-down crown against water pressure
- Resistant flat sapphire crystal and magnifying lens at 3 o'clock
- Markings on the dial and hands with Swiss Super-LumiNova®
- Swiss automatic movement Sellita SW200-1 with the highest setting for precision

### WINDING

First, wind your watch manually (in pos. **0**) by turning the crown clockwise several times. Afterwards, your watch will automatically be wound by every movement of your wrist.

**CROWN IN POS. 0:** Initial position. By turning the crown or by wearing the watch on the wrist you can wind up the movement.

**CROWN IN POS. 1:** By turning the crown the date can be adjusted. Important: Do not adjust the date between 9 p.m. and 3 a.m. During that period, several complex operations take place and any outside interference may damage the movement.

**CROWN IN POS. 2:** Exact time setting, standstill of watch (the second hand stops). Turn minute and hour hand until the exact time is set.
